CSBS BS

Record ID _____

CSBS DP Behavior Sample

Administered by: _____
Scored by: _____CHILD ID: [record-name] DOB: [consent_arm_1][demo_dob]
VISIT MONTH: [event-label] DOE: _____
DE: _____
DATA VALIDATED: [csbsbs_val_by] [csbsbs_val_date] VISIT DATE: [csbsbs_refdate:hideunderscore] [csbsbs_refdate2:hideunderscore]DOE (required) = the date the Behavior Sample was given, copied from the DOE on the paper form. Do not use the date of data entry: the Today button is switched off on purpose and future dates are refused. Every age and norm on this form is calculated from this date. DOB and VISIT MONTH come from Demographics and the event; DATA VALIDATED fills in from the Data Validated section at the end of the merged record (the same initials and date as on the folder sticker). VISIT DATE next to it is this visit's Visit Date (and Day 2, if any) from NANO Study Surveys, hard-coded for each child, so 5001, 5001--1 and 5001--2 show the same date.

Check before using these scores: [csbsbs_issues]

Scoring check passed. Every worksheet box, count and date that REDCap needs is entered and consistent.

Note: [csbsbs_notes]

CSBS DP Behavior Sample: Caregiver Perception Rating

Instructions for caregivers: Please compare your child's behavior during the communication and play assessments we have just completed to your observations of your child in similar situations. Select the response that comes closes to your observations.

1. Alertness

◯ Less than usual/sleepy ◯ Typical ◯ Very alert/greater than usual

2. Emotional reaction

◯ More negative than usual ◯ Typical ◯ More positive than usual

3. Level of interest and attention

◯ Less interest than usual ◯ Typical ◯ Greater interest/greater attention

4. Comfort level

◯ More cautious/more wary than usual ◯ Typical ◯ More comfortable/relaxed than usual

5. Level of activity

◯ Less active than usual ◯ Typical ◯ More active than usual

6. Overall level of communication

◯ Less than usual ◯ Typical ◯ Greater than usual

7. Play behavior

◯ Less organized and less focused ◯ Typical ◯ More organized and focused

Comments:

_____

CSBS DP Behavior Sample: Scoring Worksheet

Child ID: [record-name] Date completed (DOE): [csbsbs_doe] Date of birth: [consent_arm_1][demo_dob]
Chronological age (in months): [csbsbs_age_chron] (auto)Chronological age is calculated automatically: time from date of birth to the DOE in completed months. For children born before 37 weeks the adjusted (corrected) age and scores are also calculated automatically in the Scoring Summary. Copy every box exactly as marked on the paper; the grey boxes in the Weighted Raw Score lines are calculated, the white ones are typed from the paper.Sampling Opportunity:1
Wind-up toy2
Balloon3
Bubbles4
Jar5
Books6
Play

Worksheet entered (helper: 1 once any worksheet box, rating or count is entered) _____

COMMUNICATION SCALES (score during Opportunities 1 to 6): Emotion and Eye Gaze

	(1) Wind-up toy	(2) Balloon	(3) Bubbles	(4) Jar	(5) Books	(6) Play
1. Gaze shifts	☐	☐	☐	☐	☐	☐
2. Shared positive affect	☐	☐	☐	☐	☐	☐
3. Gaze/point following (Balloon and Books only)	☐	☐	☐	☐	☐	☐

Scale 1: gaze shifts (opportunities checked)

_____
(Auto-calculated from the worksheet boxes above.)

Scale 2: shared positive affect (opportunities checked)

_____
(Auto-calculated from the worksheet boxes above.)

Scale 3: gaze/point following (Balloon and Books only; weighted x 3)

_____
(Auto-calculated from the worksheet boxes above.)

Emotion and Eye Gaze weighted raw score (Scale 1 + Scale 2 + Scale 3 x 3) _____

Weighted Raw Score:Scale 1[csbsbs_scale1:hideunderscore]+ Scale 2[csbsbs_scale2:hideunderscore]+ Scale 3[csbsbs_scale3:hideunderscore]× 3 =[csbsbs_emotionraw:hideunderscore]

Communication

4. Rate of communicating

	0	1	2	3+
(1) Wind-up toy	○	○	○	○
(2) Balloon	○	○	○	○
(3) Bubbles	○	○	○	○
(4) Jar	○	○	○	○
(5) Books	○	○	○	○
(6) Play	○	○	○	○

	(1) Wind-up toy	(2) Balloon	(3) Bubbles	(4) Jar	(5) Books	(6) Play
5. Behavior regulation	☐	☐	☐	☐	☐	☐
6. Social interaction	☐	☐	☐	☐	☐	☐
7. Joint attention	☐	☐	☐	☐	☐	☐

Scale 4: rate of communicating (sum of the six ratings; divided by 3)

_____

(Auto-calculated from the worksheet boxes above.)

Scale 5: behavior regulation (opportunities checked)

_____

(Auto-calculated from the worksheet boxes above.)

Scale 6: social interaction (opportunities checked)

_____

(Auto-calculated from the worksheet boxes above.)

Scale 7: joint attention (opportunities checked)

_____

(Auto-calculated from the worksheet boxes above.)

Communication weighted raw score (Scale 4 / 3 + Scale 5 + Scale 6 + Scale 7, rounded)

_____

Weighted Raw Score:Scale 4[csbsbs_scale4:hideunderscore]÷ 3 + Scale 5[csbsbs_scale5:hideunderscore]+ Scale 6[csbsbs_scale6:hideunderscore]+ Scale 7[csbsbs_scale7:hideunderscore]=[csbsbs_comraw:hideunderscore]Rounded to the nearest whole number (.5 rounds up).

Gestures

8. Inventory of conventional gestures (check all that child uses)

☐ gives ☐ shows ☐ pushes/pulls away ☐ reaches ☐ points ☐ waves ☐ nods head ☐ shakes head

	(1) Wind-up toy	(2) Balloon	(3) Bubbles	(4) Jar	(5) Books	(6) Play

9. Distal gestures	☐	☐	☐	☐	☐	☐

Scale 8: conventional gestures used (weighted x 2)

_____
(Auto-calculated from the worksheet boxes above.)

Scale 9: distal gestures (opportunities checked)

_____
(Auto-calculated from the worksheet boxes above.)

Gestures weighted raw score (Scale 8 x 2 + Scale 9)

_____

Weighted Raw Score:Scale 8[csbsbs_scale8:hideunderscore]× 2 + Scale 9[csbsbs_scale9:hideunderscore]=[csbsbs_gesraw:hideunderscore]

Sounds

	(1) Wind-up toy	(2) Balloon	(3) Bubbles	(4) Jar	(5) Books	(6) Play
10. Syllables with consonants	☐	☐	☐	☐	☐	☐

11. Inventory of consonants (check all that child uses)
(Ten boxes as on the paper. Older entries may also show /p/, /t/ or /k/ checked separately; each pair still counts once toward Scale 11.)

☐ /m/ ☐ /n/ ☐ /b/ or /p/ ☐ /p/ (older entries only) ☐ /d/ or /t/ ☐ /t/ (older entries only)
☐ /g/ or /k/ ☐ /k/ (older entries only) ☐ /w/ ☐ /l/ ☐ /y/ ☐ /s/ ☐ /sh/

Scale 10: syllables with consonants (opportunities checked)

_____
(Auto-calculated from the worksheet boxes above.)

Scale 11: consonant inventory (/b/ or /p/, /d/ or /t/, /g/ or /k/ count once each; weighted x 2)

_____
(Auto-calculated from the worksheet boxes above.)

Sounds weighted raw score (Scale 10 + Scale 11 x 2)

_____

Weighted Raw Score:Scale 10[csbsbs_scale10:hideunderscore]+ Scale 11[csbsbs_scale11:hideunderscore]× 2 =[csbsbs_soundsraw:hideunderscore]Scale 11 counts /b/ or /p/, /d/ or /t/ and /g/ or /k/ once each, as on the paper.

Words

	(1) Wind-up toy	(2) Balloon	(3) Bubbles	(4) Jar	(5) Books	(6) Play
12. Words	☐	☐	☐	☐	☐	☐

13. Inventory of words
write examples of words used:1 _____2 _____3 _____4 _____5 _____6 _____7 _____8 _____9 _____10 _____11 _____12 _____13 _____14 _____15 _____16 _____

13. Inventory of words: list typed on older forms
(before the word boxes were added)

_____

Number of item 13 word boxes filled in _____

	(1) Wind-up toy	(2) Balloon	(3) Bubbles	(4) Jar	(5) Books	(6) Play
14. Word combinations	☐	☐	☐	☐	☐	☐

15. Inventory of word combinations
write examples of words combined:1 _____2 _____3 _____4 _____5 _____6 _____7 _____8 _____

15. Inventory of word combinations: list typed on older forms (before the boxes were added) _____

Number of item 15 word combination boxes filled in _____

Scale 12: words (opportunities checked) _____
(Auto-calculated from the worksheet boxes above.)

Scale 14: word combinations (opportunities checked) _____
(Auto-calculated from the worksheet boxes above.)

Words weighted raw score (Scale 12 + Scale 13 / 2 + Scale 14 + Scale 15, rounded) _____

Weighted Raw Score:Scale 12[csbsbs_scale12:hideunderscore]+ Scale 13_____÷ 2 + Scale 14[csbsbs_scale14:hideunderscore]+ Scale 15_____=[csbsbs_wordsraw:hideunderscore]White boxes: type the Scale 13 and Scale 15 counts written on the paper (0-16 and 0-8). Boxes filled in above: [csbsbs_13_n:hideunderscore] words, [csbsbs_15_n:hideunderscore] word combinations. Rounded to the nearest whole number (.5 rounds up).

SYMBOLIC BEHAVIOR SCALES (score only during Opportunity 6, Play): Understanding

16. Language comprehensionobject names:1 _____2 _____3 _____4 _____(maximum of 3 raw score)person names:1 _____2 _____3 _____(maximum of 2 raw score)body parts:1 _____2 _____3 _____4 _____(maximum of 3 raw score)

Understanding weighted raw score ((object + person + body part names) x 3) _____

Weighted Raw Score:Object names_____× 3 + Person names_____× 3 + Body parts_____× 3 =[csbsbs_underraw:hideunderscore]White boxes: type the number correct written on the paper (maximum raw score 3, 2 and 3).

Object Use

17. Inventory of action schemes (check all that child uses)

☐ puts in ☐ puts on ☐ drinks with bottle ☐ drinks with cup ☐ hugs ☐ kisses
☐ feeds with utensil ☐ feeds with bowl ☐ stirs ☐ scoops ☐ pours

17. Other action (box 12 on the paper; write it in): _____

18. Action schemes toward other
write action numbers & agent's initials:1 _____2 _____3 _____4 _____5 _____6 _____

18. Action schemes toward other: list typed on older forms (before the boxes were added) _____

Number of item 18 boxes filled in _____

19. Sequences action schemes
write action numbers:1 _____2 _____3 _____4 _____5 _____6 _____

19. Sequences action schemes: list typed on older forms (before the boxes were added) _____

Number of item 19 boxes filled in _____

20. Stacks tower of blocks (circle highest number)

◯ refuses, mouths, or bangs (0) ◯ tries but fails to stack (1) ◯ stacks (2) ◯ stacks (3)
◯ stacks (4) ◯ stacks (5)

Scale 17: action schemes used (boxes checked plus 'other action' if written) _____
(Auto-calculated from the worksheet boxes above.)

Scale 20: stacks tower of blocks (highest number circled) _____
(Auto-calculated from the worksheet boxes above.)

Object Use weighted raw score (Scale 17 + Scale 18 + Scale 19 + Scale 20) _____

Weighted Raw Score:Scale 17[csbsbs_scale17:hideunderscore]+ Scale 18_____+ Scale 19_____+ Scale 20[csbsbs_scale20:hideunderscore]=[csbsbs_objectraw:hideunderscore]White boxes: type the Scale 18 and Scale 19 counts written on the paper (0-6 each). Boxes filled in above: [csbsbs_18_n:hideunderscore] and [csbsbs_19_n:hideunderscore].

CSBS DP Behavior Sample: Scoring Summary (auto-calculated)

Everything in this Scoring Summary is calculated automatically from the worksheet above, the DOE, and Demographics (date of birth, due date, gestational age). Nothing here is typed by staff.

- Chronological age = time since date of birth, in completed months (never rounded up).
- Adjusted age = time since due date (40 weeks gestation baseline), used when gestational age is under 37 weeks; for full-term children it equals chronological age.
- Standard scores and percentile ranks come from the CSBS DP Behavior Sample norms (Appendix C), normed for 12-24 months (12-14, 15-17, 18-20, 21-24). Age equivalents come from the Behavior Sample age-equivalent table and are shown when standard scores are not normed for the child's age (for example at the 9-month visit).
- Scoring problems and notes are shown in the status box at the top of the form. The DOE is checked against this visit's Visit Date (day 1 or day 2) from NANO Study Surveys, shown as VISIT DATE at the top of the form, and against the visit month.

CSBS DP Behavior Sample: Scoring Summary (chronological age norms)
Chronological age: [csbsbs_age_chron:hideunderscore] months. Norms used to score: [csbsbs_normtab_chron:hideunderscore]Weighted raw scoreStandard scorePercentile rankConcern (1 = yes)Cluster scoresSocialEmotion and Eye Gaze[csbsbs_emotionraw:hideunderscore][csbsbs_emotionstandard:hideunderscore][csbsbs_emotionpercentile:hideunderscore][csbsbs_emotion_conc:hideunderscore]Communication[csbsbs_comraw:hideunderscore][csbsbs_comstandard:hideunderscore][csbsbs_compercentile:hideunderscore][csbsbs_communication_conc:hideunderscore]Gestures[csbsbs_gesraw:hideunderscore][csbsbs_gesturesstandard:hideunderscore][csbsbs_gesturespercentile:hideunderscore][csbsbs_gestures_conc:hideunderscore]SpeechSounds[csbsbs_soundsraw:hideunderscore][csbsbs_soundsstandard:hideunderscore][csbsbs_soundspercentile:hideunderscore][csbsbs_sounds_conc:hideunderscore]Words[csbsbs_wordsraw:hideunderscore][csbsbs_wordsstandard:hideunderscore][csbsbs_wordspercentile:hideunderscore][csbsbs_words_conc:hideunderscore]SymbolicUnderstanding[csbsbs_underraw:hideunderscore][csbsbs_understandingstandard:hideunderscore][csbsbs_understandingpercentile:hideunderscore][csbsbs_understanding_conc:hideunderscore]Object Use[csbsbs_objectraw:hideunderscore][csbsbs_objectstandard:hideunderscore][csbsbs_objectpercentile:hideunderscore][csbsbs_objectuse_conc:hideunderscore]Composite scoresSocial[csbsbs_socialcompositecalc:hideunderscore][csbsbs_socialstandard:hideunderscore][csbsbs_socialpercentile:hideunderscore][csbsbs_social_conc:hideunderscore]Speech[csbsbs_speechcompositecalc:hideunderscore][csbsbs_speechstandard:hideunderscore][csbsbs_speechpercentile:hideunderscore][csbsbs_speech_conc:hideunderscore]Symbolic[csbsbs_symboliccompositecalc:hideunderscore][csbsbs_symbolicstandard:hideunderscore][csbsbs_symbolicpercentile:hideunderscore][csbsbs_symbolic_conc:hideunderscore]TOTAL[csbsbs_totalrawcalc:hideunderscore][csbsbs_total:hideunderscore][csbsbs_totalpercent:hideunderscore][csbsbs_total_conc:hideunderscore]Concern = standard score 6 or below for clusters and composites, 81 or below for the TOTAL. Standard scores, percentile ranks and concern stay blank when the chronological age is outside 12-24 months (for example at the 9-month visit); the age equivalents are on the preterm sheet below.

CSBS BS Scoring Summary - Preterm (adjusted age)

CSBS BS Scoring Summary - Preterm

For full-term children adjusted age equals chronological age, so this sheet repeats the chronological scores and shows the age equivalents when standard scores are not normed for the age.

Ages and dates used for scoring (auto-calculated)

Chronological age in days (date of evaluation minus date of birth)	_____ (If date of birth, due date or gestational age is corrected later, run Data Quality rule H to refresh.)
Chronological age in completed months (time since date of birth; never rounded up)	_____
Gestational age at birth in weeks (from Demographics)	_____
Preterm birth, gestational age under 37 weeks (1 = yes, 0 = no)	_____
Prematurity correction in days (due date minus date of birth; 0 when full term)	_____ (Uses the recorded due date; if it is blank, uses (40 weeks minus gestational age) x 7 days.)
Due date used for adjusted age (equals date of birth when full term)	_____
Adjusted age in days (time since due date)	_____
Adjusted age in completed months (time since due date; 40 weeks gestation baseline)	_____

Visit month of this event (used to catch date typos)	_____
Norm band index, chronological age (1 = 12-14 ... 4 = 21-24 months)	_____
Norm table used for chronological age	_____
Norm band index, adjusted age (1 = 12-14 ... 4 = 21-24 months)	_____
Norm table used for adjusted age	_____
Child ID without the double data entry suffix (helper: 5001, 5001--1 and 5001--2 all give 5001)	_____
Visit Date (and Day 2) of this visit from NANO Study Surveys, hard-coded from the 10/13/2026 export and matched on the child ID (helper, Y-M-D)	_____
Visit Date of this visit (from NANO Study Surveys; shown as VISIT DATE at the top and used for the date check)	_____ (Hard-coded from the NANO Study Surveys Visit Date export of 10/13/2026 and matched on the child ID, so 5001, 5001--1 and 5001--2 share it. If a visit is not in that export, this project's Visit Occurred date is used. The DOE is flagged when it is more than 14 days from this date and from Day 2.)
Visit Date Day 2 of this visit, if any (helper; from the same NANO Study Surveys export)	_____
Source of the visit reference date (helper)	_____
Social composite weighted raw score (Emotion and Eye Gaze + Communication + Gestures)	_____
Speech composite weighted raw score (Sounds + Words)	_____
Symbolic composite weighted raw score (Understanding + Object Use)	_____
Total weighted raw score (Social + Speech + Symbolic)	_____
